COMPLETE RETROFIT SOLUTIONS

DRB Industries provides construction, service, and equipment replacement for your power generation project. Our engineering fabrication and construction partners have years of experience with all the major gas turbine OEMs, and have access to the top structural, mechanical, civil, electrical, and control systems engineers in the industry for your specific project.

INSTALLATION & CONSTRUCTION

Whether you have a new design or a total retrofit of an existing system, our highly skilled Installation & Construction crews specialize in the installation of gas turbine auxiliary equipment. Regardless of whether it is a single component or a whole “turn-key” project, we have expertise to do it expeditiously and economically. If safety cost, schedule, and quality are important to your project, DRB Industries is your answer.
